Date of Catch: _____ Location: _____

* Weight (if not known, use formula below): _____ lbs.

Length _____ ¹ Girth _____ ins squared ² = Total _____ (multiply boxes ¹ & ²)

Divide total from above by 750 _____ lbs., _____ oz. = **Total Weight**

How it Works:
Example

30 inches length and 15 inches of girth, which is squared would look like this.

$$\frac{30 \times (15)^2}{750} = \frac{30 \times (15 \times 15)}{750} = \frac{30 \times 225}{750} = \frac{6750}{750} = 9 \text{ lbs.}$$
